

R

178 In terms of technology and occupation, there
463 have been very few changes. They still farm
342 in the old way, and there have been no new jobs
178 created. There are today such houses as the
354 kapitan's, with a bit of cement work. This is
new. And every house has a pelita a kind of
lamp for which they buy kerosene. Few of
them have any real lamps like the kapitan's.
The assistant has one, but it is typically out
of order. Shirts here are new, but they are
rare and cost much. Shoes are new here and
are very rare. Pens, etc., are extremely rare.
The women no longer wear the homespun blouses.
They wear homespun sarongs like the men do,
but buy kebaya of thinner cloth today.

286 They cannot make thin cloth with their
looms, and this is a great handicap. What
they make is too heavy. This is mainly a mat-
ter of thread. They can't spin thread any
thinner than they do and have it strong enough
so that it will not break in the loom. Thus,
if they could get trade thread, they might be
able to weave thinner cloth (?).

[346] The only tin roofs are on the grave-bone
shrines of Odja and Wanda.

Every woman spins thread and weaves. There
are no specialists, however, who sell cloth.
This is done only rarely.

463 There are no smiths or specialists of any
326 kind. There were about twenty men who worked
563 at making pots here, and this started evidently
about two years ago. It was a Chinese company
(evidently tied in with the Radja some way),
and these lads worked in their spare time. As
there are no orders now, they are working
there no longer. It is not a native craft.

241 The most important local agricultural crop
and food source is maize, by far. Then come
rice, vegetables, and yams. There is no sago;
000 they have never heard of it. Little meat is
